**15% of French Tech Pass laureates in France are companies from the Montpellier area!**

\*Outside Paris

**Congratulations to all Montpellier French Tech Pass laureates!**

**Montpellier momentum leading every year**

## French Tech Pass, what is it?

French Tech Pass is a national assistance program in France, launched in 2014 for companies experiencing hyper-growth, the gems of the French Tech world.

The program's service offering comprises 5 components: funding, international actions, innovation, business development, and exposure.

The main players involved with supporting company development – French Tech, Bpifrance, DGE, Business France, Inpi, AFPC, AFIC, and UGAP – take coordinated action with French Tech metropolises to offer unique, priority, and accelerated premium services specific to the challenges of hyper-growth faced by companies.

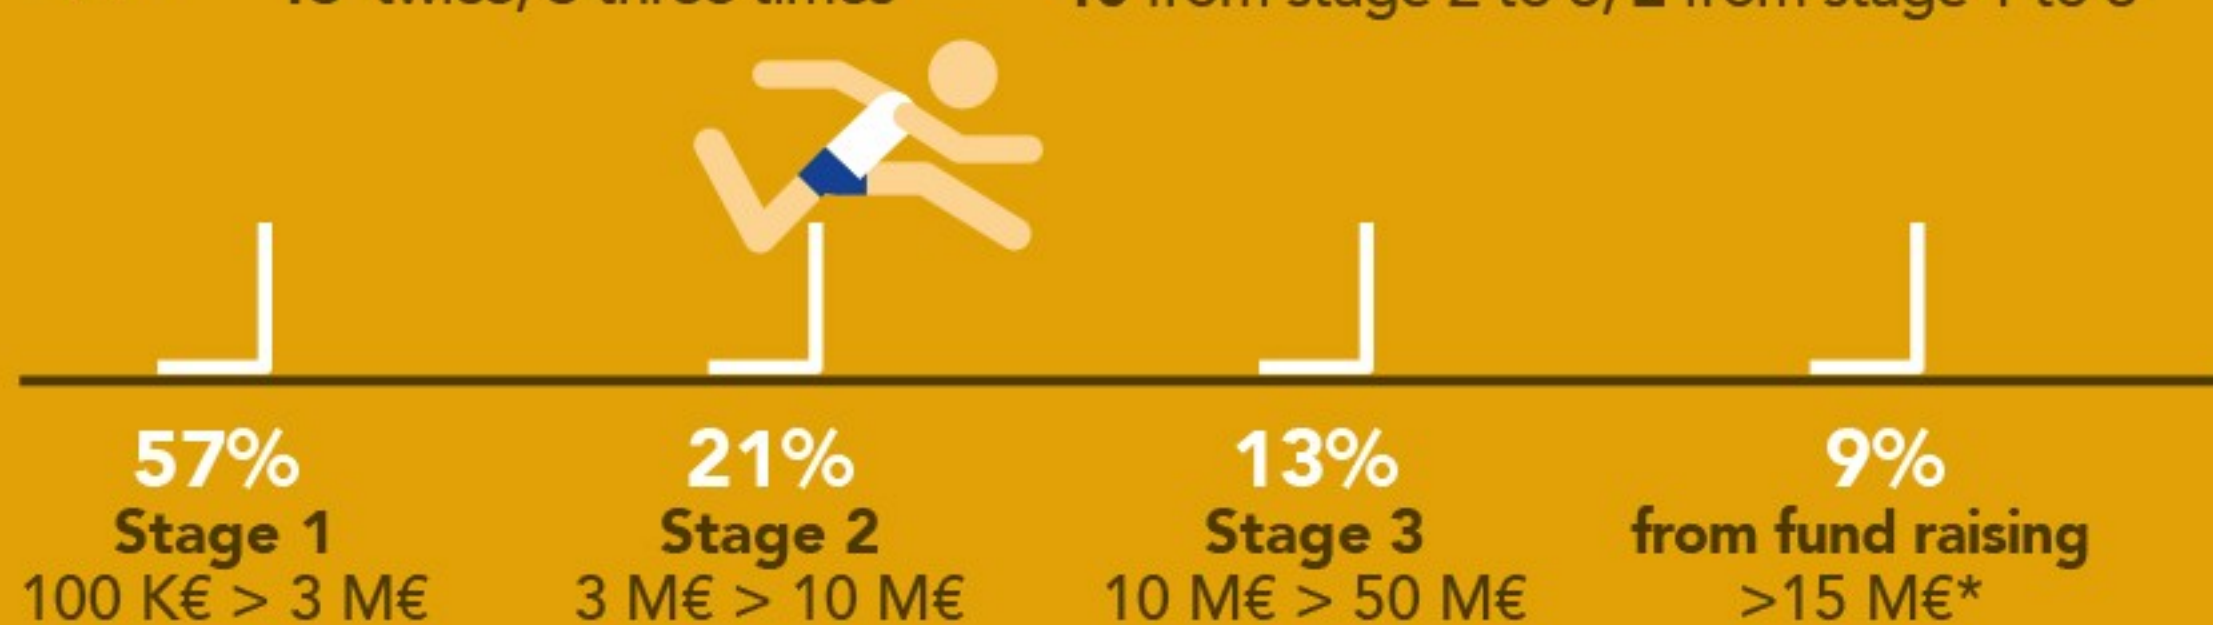

Teams working for the French Tech Pass program are committed to ensuring high quality services for companies by mobilizing their efforts and providing privileged follow-up to help the community of outstanding companies flourish around the world.

## Overview of the past 4 years
